Proven Solutions for the Mobile Workforce

Combine AirVersent Solutions with the ability of ATG's to bring you ATT Non-Stocked devices such as Mot MC35, MC 70 as well as Intermac devices..

20/20 Delivery™ 20/20 Mobility™ *empowers the logistics worker*

20/20 Mobility™ empowers logistics workers by providing mission critical information in the palm of their hand, allowing them to provide first-rate customer service. Features like barcode scanning, electronic signature capture, mobile forms, and wireless communication improve process compliance while eliminating the inefficiencies of paper manifests.

20/20 Location Based Services?

- ◆ Your fleet will be significantly more efficient, cost effective and responsive using 20/20 Location
- ◆ Based Services. Your fleet will be safer and more compliant with internal procedures, insurance regulations and transportation policies. Specifically,
- ◆ Driving directions and breadcrumb trail can significantly reduce out-of-route vehicle mileage and associated fuel, maintenance and driver overtime charges.
- ◆ Driver locator allows managers and customer service representatives to predict service times accurately improving customer satisfaction.
- ◆ Driver locator, breadcrumb trails and location alerts increase the visibility and physical security of drivers, vehicles and loads. The fleet can be managed more efficiently, and operate more safely, because you can see where they are, and where they have been, at all times.
- ◆ Breadcrumb trail provides a simple and sure means to eliminate unauthorized vehicle usage, helping you comply with DOT and insurance regulations.
- ◆ Traffic alerts inform drivers and managers of highway delays or closures on planned routes as conditions change, making your fleet more flexible and resourceful.
